Iron temperature	180C	180C to 160C	160C to 130C	100C

7 HOME CARE ADVISE

Ask the client to refrain from shampooing her hair in the next 24 hours
Recommend Home Care Products for Client hair type.

Alternative Steps To Take for Very Frizzy, Curly, or Damaged Hair

1 PRE-TREAT HAIR

Towel Dry. Saturate Hair with generous amounts of **AQUA G BASEWATER**.
towel drying if required and continue to apply.
Gently towel dry to remove excess.

Saturate Hair (Particularly ends) with **NANO KEEP**. Scrunch into hair with your fingers.

2 DRY HAIR

Gently dry the treatments into hair. The heat activates the protein and provides a great base to start the Anti-Frizz Treatment

Wet hair again using Aqua G BASEWATER.

This provides you with a healthy platform before treating the hair
Now continue to follow **Step 2** of this technical guide.
